

Hannah Thomas

hzythomas@gmail.com | linkedin.com/in/hannahtthomas528 | (979)799-4577

Front-end developer with hands-on experience in JavaScript, HTML, and CSS — including a Capstone project making government data more accessible. I bring strong collaboration and communication skills from leadership roles in student organizations, and I'm passionate about clean, user-centered design and picking up new technologies along the way.

Education

University of Massachusetts Dartmouth

May 2026

GPA 3.3/4.0; *cum laude*

B.S Computer Science with AI Concentration | Minor in Graphic Design

Computer Science Courses:

- Machine Learning
- Artificial Intelligence
- Parallel and Distributed Systems
- Database Systems
- Data Mining and Knowledge
- Algorithms and Data Structures
- Computer Organization and Design

Graphic Design Courses

- Advanced Typography
- Information Design
- Experimental Processes
- Digital Essentials

Technical Skills

-
- **Languages:** HTML5, CSS, JavaScript, Java, C, Python, SQL
 - **Frontend:** React.js, Node.js
 - **Backend & Tools:** GitHub, UML, Google Colab, Jupyter Notebook
 - **ML & Data Science:** Scikit-Learn, XGBoost, SVC
 - **UI/UX & Design:** Figma, Wireframing & Prototyping, Adobe Creative Suite, Canva
 - **Methodologies:** Agile Development, Sprint Planning, User Research, Stakeholder Communications

Featured Projects

-
- **Disaster Ready** - React, Canva, Figma, GitHub, Agile
As part of a six-person Agile team, I partnered with the Boys and Girls Club of Boston and FEMA to design and develop a real-world civic preparedness web platform, taking the project from initial stakeholder requirements all the way through to implementation. I led the UI/UX process by translating client needs into Figma wireframes and Canva mockups, then built modular React frontend components that were refined across multiple sprint cycles through code reviews and iterative feedback sessions. Throughout the project, I managed version control via GitHub — maintaining clean feature branches and ensuring consistent, reliable delivery across a cross-functional team.
 - **Macronutrient Counter** - HTML, CSS, JavaScript, Node.js
Independently designed and built a full-stack nutrition tracker from the ground up, engineering a Node.js backend and a responsive, accessible frontend that work seamlessly together. Translated complex nutritional data into a clean, intuitive interface with non-technical users in mind — striking the right balance between information density and effortless usability.
 - **Photography Website Redesign** - WordPress, Figma, Canva
Redesigned and updated a live photography website, refreshing the visual identity by creating a new logo in Adobe Illustrator and presenting layout mockups to the client using Canva. I managed content updates and site

improvements using WordPress, collaborating directly with a professional photographer over several months to align the final product with their brand vision.

Professional Experience

Dunkin' Donuts Crew Member

Dunkin Donuts

May 2024 - present

- Deliver friendly and efficient customer service in a high-volume, fast-paced environment, consistently prioritizing accuracy and a positive guest experience during peak hours.
- Collaborate with team members to maintain smooth store operations, including food preparation, order fulfillment, and keeping the workspace organized and up to standard.
- Manage multiple responsibilities simultaneously — from running the register to preparing orders — adapting quickly to shifting priorities and maintaining composure during high-traffic rushes.

Orientation Leader

University of Massachusetts Dartmouth

June 2023 - January 2026

- Mentored cohorts of 30+ incoming engineering students, providing personalized guidance on academic planning, campus resources, and student life to support a smooth transition into college.
- Collaborated with fellow Orientation Leaders, faculty, and staff from diverse backgrounds to plan and execute large-scale orientation programs, managing schedules and logistics across multiple cycles.
- Served as a consistent point of contact for new students, facilitating one-on-one advising sessions and leading group presentations to build community and confidence early in their college experience.

College Positive Tour Leader

University of Massachusetts Dartmouth

September 2025 - November 2025

- Deliver friendly and efficient customer service in a high-volume, fast-paced environment, consistently prioritizing accuracy and a positive guest experience during peak hours.
- Collaborate with team members to maintain smooth store operations, including food preparation, order fulfillment, and keeping the workspace organized and up to standard.
- Manage multiple responsibilities simultaneously — from running the register to preparing orders — adapting quickly to shifting priorities and maintaining composure during high-traffic rushes.

Activities

- Society of Women Engineers, Outreach, Social Media January 2025 - May 2026
 - Organized and promoted STEM outreach events aimed at increasing student engagement in technology, coordinating logistics, outreach efforts, and on-the-day execution to ensure events ran smoothly and left a lasting impression.
 - Developed and managed social media content and digital communications across platforms weekly, crafting posts and graphics that boosted event visibility, drove participation, and helped grow the chapter's online presence.
- Sapphic Society, Vice President
- The Firsts, Vice President
